

DT Global

Economic Growth

Equitable economic growth can improve lives, drive development, and alleviate poverty. DT Global's Economic Growth practice works with the public and private sectors to champion policies that transform the economic environment at the local, regional, and national levels while creating sustainable economic opportunities for communities and businesses. Combined with effective infrastructure, a strong legal framework, and well-functioning markets, strong policy creates an environment that spurs private enterprise growth and expands employment opportunities. Supporting both the public and private sectors, DT Global's services span a broad range of technical areas, from enterprise development and economic governance, to trade and market expansion, to the creation of a stronger business enabling environment.

We support locally driven, market-oriented solutions to build enterprise, promote sound policies, and capitalize on opportunities for lasting change and sustainable economic growth.

Who is DT Global?

DT Global is shaping a future where sustainable development and innovation empower individuals, communities, and nations. We work in partnership with local stakeholders to foster inclusive prosperity, social equity, and environmental stewardship. Our global team of 2,500 staff and experts work in over 90 countries to solve complex problems in the peacebuilding, governance, economic development, environment, and human development sectors. With a track record of technical excellence and more than 60 years of international development experience and relationships, we deliver innovative solutions that transform lives.

Economic Reform

DT Global's work strengthens regulatory systems, reforms public administration, and modernizes financial sectors by establishing and enforcing critical market-supporting institutions. Our economic governance specialists provide capacity building services to government institutions, including economy and finance ministries, treasury offices, tax and auditing departments, national statistics institutes, and export and investment bodies. We also help governments and the private sector reform commercial laws and regulations to support the business enabling environment.

Private Sector Development

We work with the private sector—including small and medium-sized enterprises (SME)—to increase private sector growth, enhance competitiveness, and encourage economic participation. We provide tailored solutions to promote an enabling business environment and regulatory reform, enhance SME development and competitiveness, promote cluster development and value chains, and support entrepreneurship and innovation. We help firms with value-enhancing supply chains, international trade standard compliance, and access to business support services and financial resources. We also offer extensive Public Private Partnership support.

Trade and Competitiveness

DT Global works with governments on their integration into the international and regional trading and investment system. Our team champions policy and legislative reforms, procedural and technical improvements, and sustainable capacity development. Our experts specialize in trade facilitation and export promotion, trade policy, negotiation, implementation and monitoring of trade agreements, foreign investment, quality infrastructure, and technical barriers to trade. We advise governments on compliance with international standards and trade agreements to strengthen market linkages and expand export and investment opportunities.

Livelihoods and Food Security

DT Global improves the social and economic well-being of communities through agriculture and economic development activities. Our team collaborates with local stakeholders to foster enterprise growth and employment. We implement cash-for-work community infrastructure initiatives and deliver vocational education programs for vulnerable groups. Our work removes barriers to economic participation, rehabilitates market-supporting infrastructure, promotes a business enabling environment, and builds change management capacity. We support land management and reform, agriculture policy, agricultural value chain development and access to markets, livestock development, fisheries and aquaculture, and nutrition and food security programs.

Tourism and Culture

DT Global designs and implements strategic activities to improve tourism promotion, support the development of creative industries as a source of job creation and economic diversification, and preserve cultural heritage around the world. We provide a full suite of tourism and hospitality support, from strategic planning and feasibility studies to developing tourism master plans for public and private entities. Our team supports the development of creative industries such as visual art, cinema, music, theatre, and handicrafts.

Rural Development

DT Global works with rural communities to improve their agricultural and food security, health, education, climate resilience, sustainable natural resource management, and economic futures. We provide technical assistance at national and local levels to review and implement pro-poor policies and regulatory frameworks that support rural livelihoods. We promote rural economic development through market analysis; value chain assessments; rural access to finance; agricultural, horticultural, and cultural export promotion; and direct technical assistance to rural farmers, fishers, and small business owners.
