

RFP - Green Shipping Corridor Assessment for Thailand

About the Proposal

Program Background

Partnerships for Infrastructure (P4I) is an Australian Government initiative supporting quality, inclusive infrastructure development across Southeast Asia. P4I works with partners to strengthen policy and regulatory frameworks and address barriers to infrastructure project development across four sectors, including maritime decarbonisation, with inclusion and climate considerations integrated throughout. Under this activity, P4I is seeking advisory services to assess a potential Green Shipping Corridor between Thailand and Singapore, building on P4I's earlier work identifying priority maritime decarbonisation opportunities for Thailand.

About DT Global Asia Pacific

At DT Global Asia Pacific, we aim to positively impact people's lives through delivery excellence. As a leading implementing partner across Asia and the Pacific, we co-create locally led solutions in partnership with governments, communities, and stakeholders. We bring together talented teams and deep regional expertise to deliver initiatives that promote inclusive economic growth, essential services, and resilient, secure communities. With over 1,500 staff, experts in 22+ countries and more than 60 years of development experience, we tackle complex community, national and transnational challenges, from governance and justice systems to climate resilience, infrastructure and social equity, with innovative thinking and a commitment to long-term impact.

The Activity

The activity involves assessing the feasibility of a Thailand–Singapore Green Shipping Corridor, covering fuel pathways, infrastructure readiness, vessel and trade characteristics, emissions and financial analysis, and socio-economic impacts, working closely with Thailand's Marine Department, Office of Transport and Traffic Policy and Planning, and Port Authority of Thailand.

This activity calls for a multidisciplinary team covering the following mandatory functions:

- Overall Project Lead
- Project Manager
- Emissions Expert
- Commercial and Financial Expert
- Socio-Economic Expert

There is no strict requirement on team composition, providing the mandatory functions are adequately covered by the collective proposed team.

Interested suppliers should have demonstrated experience in maritime decarbonisation and green shipping corridor assessment methodologies; see the RFP for full evaluation criteria.

Full RFP requirements, evaluation criteria, and submission details are available on the [attached PDF](#).
